The 875 Professional Series OHV 190cc Engine produces 8.75 footpounds of gross torque to power through your weekend projects, while the maintenance free axial cam pump offers higher pressure output and low effort starting with Easy Start Technology. 58 pound assembled weight and never go flat wheels make the 20503 easy to maneuver in the backyard or around the house. This unit features a 1 gallon detergent injection system that infuses cleaning solution into the water stream for a faster cleaning experience. This unit includes 4 quickconnect spray tips for predefined spray patterns 0, 15, 40 and soap, 2 10 inch never go flat wheels, 30 foot L high pressure hose, engine oil, user quick start guide and operators manual. Other features include a quiet sense automatic throttle that's up to 40 percent quieter than standard pressure washers, high temperature thermal relief that automatically purges overheated water to protect the pump and a fold down pressure washer handle with accessory compartment. Fuel tank capacity in gallons is 0.3. This product does not have adjustable pressure regulation. Pressure washers are rated in accordance to the Pressure Washer Manufacturer Association PWMA standard PW1012010 Testing and Rating

Performance of Pressure Washers. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Duane Hanke 5.0 out of 5 stars I would definitely recommend this machine. <http://arrhythmiaclinic.com/userfiles/20200913023618.xml>

PSI but only with the most restrictive zero degree tip installed. 2500 psi with 40 degree tip. Also, can not find a horsepower rating anywhere, just a torque rating of 8.75, which means nothing to me. It is very loud. If you can get it running it's great. Don't buy Ready Start nothing wrong with manual choke! Biggest mistake ever. This ready start auto choke system is pure garbage. It starts OK but then runs choked out for the next 10 minutes. You can literally go through half a tank of gas in 10 minutes as this thing tries to warm up. Why anyone would try to simplify an already simple process of using a Manual choke is beyond understanding. I have this same sized engine that is a Honda on a wood splitter. This Honda engine has a Manual choke It starts right up, I turn the choke off in a few seconds and I can literally run that Honda for close to two hours on the same amount of gas my 875 Briggs coughs on. My advice, stay away from Briggs and Stratton engines with Ready Start. They are junk. Orders will continue to ship. The first number will be your model number, the second — your engine type number, and the third will be the code number. Briggs And Stratton Professional Series 175Cc Manual PDF.
