To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. See All Buying Options Add to Wish List Disabling it will result in some disabled or missing features. You can still see all customer reviews for the product. Please try again later. From the United StatesIt uses a mechanism similar to the Daisy Powerline 1200. You cock the gun manually before each shot by pulling a lever under the barrel forward and releasing it. This cocks the gun and loads a BB. The gun is loaded by pouring BBs into a reservoir. The gun loads through a square opening at the rear of the gun. Pull down on door and fill up with BBs. The rear sight is a square notch that is adjustable for windage by sliding it in a dovetail. The front sight is a ramp. The CO2 powerlet is loaded by removing the left grip and unscrewing the tension screw. The powerlet is inserted and the screw tightened. Once you hear the hiss of the CO2, replace the grip and youre ready to go. The pistol takes more effort to cock than a 1200. Ive been able to get 1.02.0 inch groups offhand at 20 feet. The gun shoots very well for a smoothbore BB CO2 repeater. It is quiet for a CO2 pistol and delivers muzzle velocities of over 400 fps with a new CO2 powerlet. There are now blowback CO2 pistols and CO2 pistols that are nearly exact replicas of real steel firearms. Still, for a combination of power, accuracy, economy of gas and just plain shooting fun this old gun is hard to beat. If you like shooting CO2 BB guns and get a chance to buy a Daisy Powerline 1200 or 1700 you should make the purchase.Please try again later. Please try again later. **STEP 2: LOAD BB INTO CHAMBER BY COCKING AND SHAKING WHILE MUZZLE IS POINTED DOWNWARD**

Point your gun in a safe direction and lower muzzle approximately 45 degrees to the ground (see Fig. 7). While keeping your fingers away from the muzzle place your thumb in the slot under the barrel and push cocking slide fully forward until it stops (see Fig. 8). While holding the cocking slide forward gently shake the pistol (see Fig. 9). This will assure that a BB loads into the chamber. Release the cocking slide. **A BB IS NOW LOADED INTO THE CHAMBER SO USE EXTREME CAUTION IN HANDLING OF THE GUN.**

NOTE: INNER BARREL EXTENDS PAST MUZZLE WHEN COCKING SLIDE IS FULLY FORWARD.

This high output fog machine boasts an exclusive masterandslave mode together with smart details that make operation a breeze. Sporting a powerful 1,700 watt heater and massive output of 24,720 cubic feet per minute, it fills large stages and venues with dense, consistent fog after an initial

warmup time of 7 minutes only. Fluid tank illumination indicates the fog machine is ready for operation. The INSTANT FOG 1700 PRO is controlled via DMX in 3channel mode or an easytoread highcontrast 16 x 2 character LCD and four buttons. It provides both 3pin and 5pin DMX inputs and outputs and powerCON compatible connectors. A convenient automatic shutdown feature prevents damage to the pump when the fluid tank runs empty. The fog machine comes with a 100 mm hose adapter if you want to duct the fog from the machine to another destination. Optional accessories include a unique flyware kit, Ubracket and drip collecting tray which mount without the need for tools. Versatile and userfriendly, the INSTANT FOG 1700 PRO is the perfect choice for live events, discotheques and theatres as well as oncamera or rental applications. Up to 32 DMX devices can be daisy chained and controlled via a control source e.g. a light mixer. The master device is then set to run in standalone mode and the slave devices are set to run in slave mode.
